

The Last Reef
Recommended for ages: 7 yrs +
Synopsis: Fly across iridescent tropical structures, brush through a cloud of a million jellyfish, and visit the world of a coral reef – the “cities” beneath the sea. As these ancient, exotic havens face the threat of extinction, *The Last Reef* inspires audiences with a vision of the reef’s incredible, yet fragile, power to rebuild.

Titans of the Ice Age
Recommended for ages: 7 yrs +
Synopsis: Journey to the frozen landscapes of North America, Europe and Asia 10,000 years before modern civilization. Discover the megafauna of the past – from saber-toothed cats and cave bears to dire wolves and iconic woolly mammoths – through their fossils, and consider the future of Earth’s large mammals.

Dinosaurs Alive
Recommended for ages: 7 yrs +
Synopsis: This film brings to life the earliest dinosaurs of the Triassic Period to the monsters of the Cretaceous Period. Journey with some of the world’s preeminent paleontologists as they uncover evidence that the descendants of dinosaurs still walk (or fly) among us.

Dynamic Earth*
Recommended for ages: 10 yrs +
Synopsis: Explore the inner workings of Earth’s climate system with cutting-edge visualizations. Follow the trail of energy flowing from the sun into the atmosphere, oceans, and the biosphere. Ride along on swirling ocean and wind currents, dive into the heart of a monster hurricane, and fly into roiling deep-sea volcanoes while exploring the concept of climate change.
*This film is captioned.

Take a journey to other worlds in the comfort of the NatureSphere planetarium and full-dome movie theater.

Feature Film Options
Robinson Nature Center presents films that are appropriate for all ages in the center’s NatureSphere, a digital planetarium and movie theater that seats up to 50 people.
You may book a presentation in conjunction with birthday parties or field trip programs. For pricing, see the Robinson Nature Center birthday party and field trip program brochures. Each film lasts approximately half an hour. Films can also be seen during public programs at the NatureSphere. Show times, dates and links to movie previews can be found on the Nature Center’s website:
www.howardcountymd.gov/RobinsonNatureCenter.htm

Special Considerations
If you are coming to see a public show in the planetarium, please arrive 10 to 15 minutes early to pick up tickets and to be seated.
Due to dark conditions, and to ensure the best experience for program participants, we cannot seat patrons while the show is in progress.
Please note, the Nature Center offers “sensory-friendly” public shows in which the perimeter lights are left on and the sound is turned down. The film *Dynamic Earth* is a captioned film for those with hearing impairments or language barriers.
For more information, contact us at 410-313-0400.

RECREATION & PARKS

Astronomy and Space Science

One World, One Sky: Big Bird's Adventure

Recommended for ages: 2 yrs +
Synopsis: Big Bird, Elmo and their friend from China, Hu Hu Zhu, take viewers on a journey of discovery to learn about the Big Dipper, the North Star, the sun, and the moon. This film engages younger audiences, asking them to point, count and sing along with Big Bird and friends.
Educator's guide available.

The Little Star that Could

Recommended for ages: 2 yrs +
Synopsis: The Little Star that Could is a yellow star in search of planets of his own to protect and warm. During his journey, he meets other stars, learns what makes each star a different color, and discovers each individual planet in our solar system.
Educator's guide available.

Astronomy: 3,000 Years of Stargazing

Recommended for ages: 5 yrs +
Synopsis: In the learned company of a cartoon Einstein, this show takes audiences on a tour of the major astronomical milestones of the last 3,000 years – from very early models of space, through theories of why the sun and moon appear to move across the sky, to the contributions of Copernicus, Newton, Hubble and many others.

Earth, Moon & Sun

Recommended for ages: 5 yrs +
Synopsis: Explore the relationship between the Earth, moon and sun with the help of Coyote, an amusing character with misconceptions about our universe. Learn why the sun rises and sets and the basics of fusion and solar energy. Examine the moon's orbit, craters, phases and eclipses.

Oasis in Space

Recommended for ages: 5 yrs +
Synopsis: This film transports the audience on a startling and beautiful voyage through our universe, galaxy and solar system in search of liquid water – a key ingredient for life on Earth. Audiences discover, one by one, the surfaces of other planets in our solar system and how they differ from Earth's surface.
Educator's guide available.

We Are Aliens!

Recommended for ages: 5 yrs +
Synopsis: This film explores how our understanding of life on Earth guides the search for life elsewhere in the universe. Go on an epic journey in search of evidence of alien life forms elsewhere in the galaxy. Narration by Rupert Grint of Harry Potter fame.
Educator's guide available.

Astronaut

Recommended for ages: 7 yrs +
Synopsis: What does it take to be an astronaut? Experience the effects of a rocket launch and zero gravity on the human body. Tour the International Space Station and discover the challenges of “working” in space as Chad, the test astronaut, is subjected to them.

Impact!

Recommended for ages: 7 yrs +
Synopsis: A visually dazzling film, *Impact!* teaches about meteors, meteorites, asteroids and comets. Learn how asteroid hunters seek new objects in the solar system, and how radar is used to find meteorites that have survived to the Earth's surface.

Passport to the Universe

Recommended for ages: 7 yrs +
Synopsis: Narrated by Tom Hanks, this film treats the audience to realistic close-up views of star fields and planets, taking them on an exhilarating flight through a virtual recreation of our universe, into the Orion Nebula, out of our galaxy, and deep into intergalactic space. At the end of the film, viewers fall through a black hole to return to our universe.
Educator's guide available.

Stars

Recommended for ages: 7 yrs +
Synopsis: Every star has a story. New stars are created every day, born out of vast clouds of gas and dust. Through every phase of their existence, stars release the energy that powers the universe. Journey to the farthest reaches of our galaxy and experience both the awesome beauty and destructive power of *Stars* with narrator Mark Hamill.
Educator's guide available.

Two Small Pieces of Glass

Recommended for ages: 7 yrs +
Synopsis: This feature traces the history of the telescope, from Galileo's modifications, to a child's spyglasses, to the launch of NASA's Hubble Space Telescope. Explore the Galilean moons, Saturn's rings, and spiral structure of galaxies. Learn about Galileo, Huygens, Newton, Hubble and other astronomy greats.

Black Holes: The Other Side of Infinity

Recommended for ages: 10 yrs +
Synopsis: Narrated by Liam Neeson, this film highlights the science of some of the most mysterious objects in the universe. Witness the birth of a black hole, journey past the event horizon, experience the formation of the Milky Way and learn about the monstrous black hole that lurks at its core.
Educator's guide available.

Environmental and Historical

The Weather

Recommended for ages: 3 yrs +
Synopsis: An interactive modular planetarium program covering the national science standards for weather – grades K-2 including cloud types, weather instruments and the water cycle.

Molecularium

Recommended for ages: 5 yrs +
Synopsis: *Molecularium* makes molecular science fun and understandable! Kid-friendly characters take the audience on a journey into a raindrop to discover the molecules there and to introduce the changes between the three states of matter through amazing visuals and songs.
Educator's guide available.

Zula Patrol: Down to Earth

Recommended for ages: 5 yrs +
Synopsis: The Zula Patrol team goes on a routine fossil-hunting expedition and turns up evidence that the villainous Deliria Delight has been travelling back in time to illegally dump toxic trash. The Zula Patrollers must catch her before her actions cause catastrophic consequences. In the process, our heroes learn all about the formation and development of Earth.
